

Connect a parent card to one or more child cards

POST /io/card/:cardId/connection/many

Connect a parent card to one or more child cards.

Note: This has been deprecated in favor of our [connections create](#) endpoint.

Example Request

Connect these two child cards to the parent specified in the url

```
{
  "connectedCardIds": [ "944509659", "944511282" ]
}
```

Example Successful Response

200 OK

```

{
  "card": {
    "id": "943206946",
    "title": "Card Three",
    "boardId": "943188457",
    "boardTitle": "Example board",
    "boardVersion": "92"
  },
  "connections": [
    {
      "connectedCard": {
        "id": "944509659",
        "title": "Example Child Card",
        "boardId": "943188457",
        "boardTitle": "Example board",
        "boardVersion": "92"
      },
      "connectionType": "child"
    },
    {
      "connectedCard": {
        "id": "944511282",
        "title": "Example Child Card Two",
        "boardId": "943188457",
        "boardTitle": "Example board",
        "boardVersion": "92"
      },
      "connectionType": "child"
    }
  ]
}

```
